

EDUCATION		
The University of Auckland		Feb 2022 - Present
Bachelor of Engineering (Honours) - Software Engineering		
WORK EXPERIENCE		
Rocket Lab - IT Intern		Nov 2025 - Present
- Assisted in building and configuring mission-critical hardware used in launch operations, following strict reliability and documentation standards. - Performed daily user support ticket triage and resolution (hardware, software, network, account access), maintaining fast response times in a high-stakes environment.		
Sonkit Industry - Website SEO & Exposure Intern		Dec 2024 - Mar 2025
- Increased website traffic by 133% and referring domains by 28% through a combination of technical SEO and content-driven link-building strategies - Developed and deployed a dynamic product recommendation web application, enhancing user engagement and driving conversion through personalised suggestions based on user inputs - Designed and launched new “Application” and “Case Study” pages, improving site structure, user navigation, and content discoverability - Improved keyword rankings and search visibility on Google, GlobalSpec and IndustryStock		
Raglan Bakery - Front-of-House/Back-of-House Services		2021 - 2023
- Delivered efficient and friendly customer service in a high-volume environment, serving hundreds of customers daily - Prepared a variety of hot and cold food items while maintaining hygiene and food safety standards - Multitasked across roles, balancing customer service, food preparation, and order management to ensure smooth daily operations - Handled payments and operated the till		
PROJECTS		
WDCC Eastern Students Association Website - Project Manager		Mar 2025 - Oct 2025
- Led an 11-member agile development team to deliver a website for the Eastern Students Association - Oversaw sprint planning, task delegation, and team progress tracking using agile best practices - Facilitated team growth by mentoring new developers and resolving technical roadblocks - Coordinated integration of Stripe for payments, Payload CMS for content management, and MongoDB for data persistence for a Next.js web application		
Autonomous F1Tenth - Reinforcement Learning for Autonomous Racing		Mar 2025 - Oct 2025
- Published a research paper to ACRA 2025 on improving training efficiency and real-world transfer of reinforcement learning policies for autonomous F1Tenth racing (reducing sim-to-real gap) - Automated project build and spin-up processes by writing Bash scripts and Dockerfiles - Trained neural network control policies in Python using ROS 2, Gazebo, and LiDAR-based sensor data - Tested models on physical F1Tenth car hardware, validating performance through real-world racing experiments - Utilised Linux, SSH, and Vim for development and remote debugging		
Clen3t - AI Tic Tac Toe Game		Dec 2024
- Created a Tic Tac Toe game where users play against an AI powered by GPT-4o and GPT-o1mini - Built a responsive frontend using React.js, enabling smooth gameplay and real-time interaction - Developed RESTful APIs with Spring Boot to handle game logic, user sessions, and score tracking		
WDCC Volunteers Club Web Application - Full-Stack Developer		Feb 2024 - Oct 2024
- Collaborated with a team of 9 developers in an Agile environment, using the FERN (Firebase, Express.js, React.js, Node.js) stack to build a \$1100 web application for the UoA Volunteers Club - Implemented secure user authentication and Google login using Firebase Auth and Google APIs - Built dynamic React components with hooks for responsive UI and interactive user flows		
AWARDS		
The University of Auckland - First in Course Award in SOFTENG 310		Nov 2024
IEEE NZ Robotics and Automation Society - Service Award for the 2024 NZRO Competition		Jul 2024
The Duke of Edinburgh's Bronze Award		Jul 2017
SKILLS		
- Java, C/C++, Python, Halide, SQL, MATLAB - JavaScript, TypeScript, HTML/CSS, Tailwind, Docker - React.js, Next.js, Node.js, MongoDB, Spring Boot - Linux, Vim, SSH, ROS2, Bash, Git, GitHub, Agile - Object-Oriented Programming (OOP), Multithreading, Concurrency, API Integration, Authentication, UI/UX
